## Introduction

Congratulations on your Full Speed Ahead product. Please read these instructions and follow them for correct use. Failure to follow the warnings and instructions could result in damage to product not covered under warranty, damage to bicycle; or cause an accident resulting in injury or death. Since specific tools and experience are necessary for proper installation, it is recommended that the product be installed by a qualified bicycle technician. FSA & Vision assumes no responsibility for damages or injury related to improperly installed components.

## Warranty

Full Speed Ahead (FSA) warrants all FSA and Vision products to be free from defects in materials or workmanship for a period of two years after original purchase unless otherwise stated in the full warranty policy. The warranty is non-transferable and valid to the original purchaser of the product only. Any attempt to modify the product in any way such as drilling, grinding, and painting will void the warranty. For more information on warranty policy and instructions for completing a warranty claim, check out the Full Warranty Policy found at our website: https://www.fullspeedahead.com/en/technology

### Components

Follow the assembly order in the illustration:

- ① Right Crank w/spindle x1
- ② 2.5mm Spindle Spacers (Table 1)
- ③ Wave Washer x1
- ④ Left crank x1
- ⑤ QR Self Ext. Crank Bolt x1 (Pre-installed on left crank)
- ⑥ 0.5 mm Spacer x1

### Crankset Installation

1. This instruction refers to installing the FSA AGX+ Road Crankset into a compatible frame. For BB installation refer to BB instruction to ensure crankset and bottom bracket compatibility before proceeding.
2. Install the spindle spacer ② to the Right Crank spindle ①. Lightly grease the spindle bearing contact surface and insert from drive side.

**Note:** Gossamer Pro AGX+ Direct Mount MegaExo no need spindle spacer ② at right side. See below table 1 for 2.5mm Spindle Spacers application.

#### CAUTION
Take care not to damage plastic bearing covers during Crank Spindle ① installation.

3. Apply grease to the spindle splines. Place wave washer ③ and spindle spacer ② onto the spindle ①.

#### CAUTION
Do not tighten crank bolt over 418 kgf.cm / 38-41 Nm / 336-363 in.lbs. Do not completely flatten the wave spring washer ③. The gap between left crank arm and left bearing cup should be 1.5 - 2.0mm. If the gap is not within 1.5 - 2.0mm after applying correct torque. DO NOT tighten the crank bolt further. Recheck installation procedure and order of assembled parts. Ensure correct torque is used. The 0.5mm spacer ⑥ may be used only on frames with slightly undersized BB shells.

#### WARNING
Always use a calibrated torque wrench to tighten crank bolt ⑤. Check bolt torque 388-418 kgf.cm / 38-41 Nm / 336-363 in.lbs before each ride to ensure they have not loosened during use.
