**Introduction**

Congratulations on your Full Speed Ahead product. Please read these instructions and follow them for correct use. Failure to follow the warnings and instructions could result in damage to product not covered under warranty, damage to bicycle; or cause an accident resulting in injury or death. Since specific tools and experience are necessary for proper installation, it is recommended that the product be installed by a qualified bicycle technician. FSA & Vision assumes no responsibility for damages or injury related to improperly installed components.

**Warranty**

Full Speed Ahead (FSA) warrants all FSA and Vision products to be free from defects in materials or workmanship for a period of two years after original purchase unless otherwise stated in the full warranty policy. The warranty is non-transferable and valid to the original purchaser of the product only. Any attempt to modify the product in any way such as drilling, grinding, and painting will void the warranty. For more information on warranty policy and instructions for completing a warranty claim, check out the Full Warranty Policy found at our website: https://www.fullspeedahead.com/en/technology

**Specification**

**Model Name**

<table>
<thead>
<tr>
<th>Model Name</th>
<th>Comet MTB MegaExo cranksets</th>
<th>Gamma Pro MTB MegaExo cranksets</th>
</tr>
</thead>
</table>

**Components**

Follow the assembly order in the illustration:

1. Bottom Bracket Shell x1
2. Bearing Cup Right x1
3. Bearing Cup Left x1
4. Wave Spring Washer x1
5. Left crank w/spindle x1
6. Crank (Drive side) x1
7. Self-extracting Crank Bolt Assembly x1
8. 0.5mm spacers x1
9. 2.5mm spacers x2

**Table 1: Spindle dimension A - 2.5mm spacers**

Clearance between non-drive arm 1.5 – 2.0mm

**Crankset Installation**

1. This instruction refers to installing the FSA MTB MegaExo Crankset into a compatible frame. For BB installation refer to BB instruction to ensure crankset and bottom bracket compatibility before proceeding.
2. Install the 2.5mm spacers as Table 1 and Wave Washer onto the Spindle. Lightly grease the spindle bearing contact surface and insert from Left Bearing Cup.
   - **CAUTION**: Take care not to damage plastic bearing covers during installation.
3. Install the Right Crank onto the Spindle. Use 8mm hex wrench to tighten the QR Self Extracting Crank Bolt to 388-418 kgf.cm / 38-41 Nm / 336-363 in.lbs.
   - **CAUTION**: Do not completely flatten the wave spring washer. The gap between left crank arm and left bearing cup should be 1.5 - 2.0mm. If the gap is not within 1.5 - 2.0mm after applying correct torque, DO NOT tighten the crank bolt further. Recheck installation procedure and order of assembled parts. Ensure correct torque is used.
   - **CAUTION**: If the crank experiences lateral play after assembly, please add 1 pieces of 0.5mm spacer. After adding the spacer, it is important to note that the wave washer cannot be flattened and retain its wave form. A gap between 1.5 - 2.0mm should remain intact.
   - **CAUTION**: For service to disassemble the cranksets, loosen the self extracting bolt Crank Bolt by 8mm hex wrench to remove right crank.

Notes: Specifications of product may be changed or improved for performance. Please refer to website periodically for technical updates and revised instructions. Printed in Taiwan.
